

SCM Anywhere™
Hosted

Looking for SCM Hosting Service?

Get SCM Solution On Demand with SCM Anywhere Hosted™

Dynamsoft SCM Anywhere Hosted™ is the world's 1st hosted SCM (software configuration management) solution. It is delivered as a SaaS application and comes with **fully integrated version control, issue tracking, build automation and professional service** to manage your whole software development life cycle. SCM Anywhere Hosted is hosted in a Bell Data Center to ensure that you have the most reliable access to mission-critical data and uncompromised security.

- Improves team productivity by great performance in speed, security, scalability and reliability.
- Reduces the cost of software ownership. The solution is delivered over the Internet as a 'Software as a Service' (SaaS) application. It dramatically reduces the costs of software installation, maintenance and support.
- Simplifies your IT infrastructure. Dynamsoft hosts, manages and maintains the application so you can concentrate on building software, not on system maintenance.
- Available on the Web from any location 24/7.

Why **Software as a Service** for Software Configuration Management?

"More than 75% of IT budgets are spent just maintaining and running existing systems and software infrastructure."

~ **Gartner**

"The initial [software] purchase is usually only 5% of the total cost of owning and maintaining a program."

~ **Microsoft** in The Wall Street Journal

🔄 Why Replace VSS with SCM Anywhere Hosted?

- **Connect from Anywhere 24/7** - No matter you are working with friends on small projects or in a big enterprise, you can get started instantly. We fully understand how reliability, security and performance are important to you.
- **Simplified IT Infrastructure and Lowered TCO** - SCM Anywhere Hosted is fully managed by Dynamsoft. It can lower your total cost of ownership, increase your cost predictability and improve your development team productivity. It lets you focus on other important areas of your business.
- **Fast Remote Access and Superior Security** - SCM Anywhere Hosted is optimized for both local and web access and is designed to be more secure and reliable than most in-house deployment. Click here for the detailed white paper.
- **World Class Version Control** - Based on the widely used and proven SourceAnywhere 2, SCM Anywhere Hosted introduces many new version control features, such as Shelve/Unshelve, Project Branch & Merge, Local Pending Change, Team Foundation and Subversion work style on top of SourceSafe work style.
- **Work Item and Bug/Issue Tracking** - SCM Anywhere Hosted provides fully customizable and workflow driven bug / issue tracking. You can customize field, user form, workflow, email notification and security according to your team needs.

Lower Costs and Improve Productivity with SCM Anywhere Hosted

- Faster, more secure and reliable software configuration management solution.
- SaaS model cuts software costs. No need to invest in expensive IT infrastructure.
- Remote development teams can log in to SCM Anywhere Hosted anytime from anywhere in the world.
- No upkeep hassles because Dynamsoft looks after application maintenance, back-ups, security, technical support and disaster recovery.
- Your team can focus on what it does best—developing software.
