

Dynamsoft SourceAnywhere for VSS

Data Sheet

❖ Fast, Secure Remote Access to Visual SourceSafe

Dynamsoft SourceAnywhere™ for VSS is remote access software that extends Microsoft Visual SourceSafe beyond the office LAN, enabling you to efficiently and securely use SourceSafe over the Internet. Whether your team is down the street, across the country or around the globe, with SourceAnywhere for VSS you can access SourceSafe from any remote location over standard Internet protocols.

Microsoft **recommends** SourceAnywhere for VSS as a remote access and cross-platform solution for Visual SourceSafe.

❖ What Matters Most to Distributed Development Teams

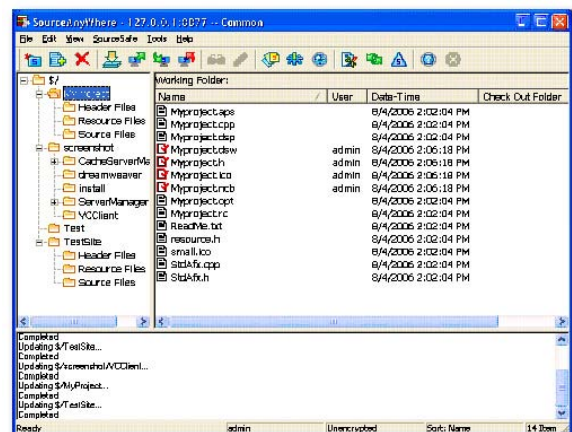

Performance – In real-world implementations, SourceAnywhere for VSS can be up to 100 times faster than SourceSafe, over the Internet. By deploying a SourceAnywhere for VSS Cache Server at a remote site you can further reduce the burden on the central code repository and improve overall performance.

Security – SourceAnywhere for VSS applies two 128-bit encryption protocols to ensure your source code is safe: the industry-wide standard **Secure Sockets Layer (SSL)** and **Blowfish**, one of the fastest cryptographic algorithms available. For added security, SourceAnywhere for VSS comes with a built-in password protection policy.

Flexibility – SourceAnywhere for VSS provides broad platform support and integrates with the industry's most popular IDEs.

Dynamsoft SourceAnywhere for VSS

Data Sheet

SourceAnywhere for VSS Features

- High performance remote access
- Cache server manages load and bandwidth for geographically distributed teams
- Java client works with Linux, Solaris, Apple, HP-UX, SCO Unix, FreeBSD or any operation system that supports the J2SE Java runtime environment
- Secure distributed development environment with 128-bit SSL and Blowfish encryption
- Robust and flexible password policy
- Time zone management
- Plug-ins provided for Eclipse, Visual Studio, Macromedia Dreamweaver and Flash development environments
- A delta transfer approach ensures only the changes between two files or assets are passed to and from the code repository.
- Java SDK and COM SDK

Why Choose SourceAnywhere for VSS?

- **Increased Productivity** – Developers at multiple locations access the centralized code base rapidly, and don't get bogged down in communications about project status.
- **Secure Distributed Development** – Protect your code repository from both accidents and malevolent attacks.
- **A Familiar Face** – SourceAnywhere for VSS's user interface is designed to resemble SourceSafe, significantly reducing the learning curve and making it easy for developers to get started using SourceAnywhere for VSS.
- **Protect Your Legacy Investment** – SourceAnywhere for VSS builds on the benefits of SourceSafe to deliver improved performance, usability and security for distributed development teams. SourceAnywhere for VSS extends the investment you've already made in VSS.

"We like the product, it's easy to use. Your support has been very responsive."

Lin Li, Hewlett-Packard Company

Gartner on distributed development teams:

"Already, more than 300 of the Fortune 500 firms do business with Indian IT services companies. In addition, more than 40 percent of U.S. corporations will have completed some type of offshore IT pilot program."

Ed Frauenheim, News.com
